

REACH Conference on Water Security and Poverty

27-29 March 2019 | Keble College, University of Oxford, UK

Since 2015, the DFID-funded REACH programme has been collaborating with government, practitioner and enterprise stakeholders to improve water security for millions of poor people in Africa and South Asia by delivering world-class science that influences policy and practice.

On 27-29 March, REACH's international conference on Water Security and Poverty will convene leading practitioners and scientists in Oxford to discuss key results to date from REACH in Bangladesh, Kenya and Ethiopia, and continue to shape major academic, policy and practice debates around water security and poverty.
